

**EXECUTIVE SUMMARY OF CHANGES
SUPERINTENDENT'S PROPOSED COMPENDIUM
2007
LAKE CLARK NATIONAL PARK AND PRESERVE**

Lake Clark National Park and Preserve is seeking public comment on the park's proposed 2007 Superintendent's Compendium. The attached proposed compendium is a written compilation of designations, closures, permit requirements and other restrictions imposed under the Superintendent's discretionary authority. After review and consideration of the need for annual updates, the park is not proposing any changes.

**LAKE CLARK NATIONAL PARK AND PRESERVE
COMPENDIUM
2007**

National Park Service (NPS) regulations applicable to the protection and equitable public use of units of the National Park System grant specified authorities to a park superintendent to allow or restrict certain activities. NPS regulations are found in Titles 36 and 43 of the Code of Federal Regulations (CFR) and created under authority and responsibility granted the Secretary of Interior in Titles 16 and 18 of the United States Code. The following compendium comprises a listing of NPS regulations that provide the Superintendent with discretionary authority to make designations or impose public use restrictions or conditions in park areas. The applicability and scope of the compendium is articulated in 36 CFR Sections 1.2 and 13.2, and 43 CFR Section 36.1.

The larger body of NPS regulations that do not provide discretionary authority to the Superintendent is not cited in this compendium. A complete and accurate picture of regulations governing use and protection of the unit can only be gained by viewing this compendium in context with the full body of applicable regulations found in Titles 36 and 43 CFR. *Please contact Lake Clark National Park and Preserve, Port Alsworth, Alaska at (907) 781-2218 for questions relating to information provided in this compendium.*

2.10(d) Food storage: designated areas and methods

(1) Definition: A *bear resistant container* (BRC) means an item constructed to prevent access by a bear. BRC's include—

- Items approved by the Department of Interior and Agriculture's Interagency Grizzly Bear Committee (<http://www.fs.fed.us/r1/wildlife/igbc/>);
- Items approved by the National Park Service's Sierra Interagency Black Bear Group (<http://www.nps.gov/seki/snrm/wildlife/sibbwg.htm>);
- Any additional items listed by the State of Alaska, Department of Fish and Game, Division of Wildlife Conservation (<http://www.wildlife.alaska.gov/aawildlife/containers.cfm#lightweight>), with the concurrence of the Superintendent; and
- Items approved by the Superintendent.

(2) In designated areas - within ½ mile of the coast line of Cook Inlet and within ½ mile of the shore line of Telaquana Lake, Turquoise Lake, Upper Twin Lake and Lower Twin Lake – food and beverages, food and beverage containers, garbage and harvested fish must be stored in a bear resistant container (BRC) or secured—

- Within a hard sided building;
- Within lockable and hard sided section of a vehicle, vessel, or aircraft; or

- By caching a minimum of 100 feet from camp and suspending at least 10 feet above the ground and 4 feet horizontally from a post, tree trunk or other object on a line or branch that will not support a bear's weight.

(3) This regulation does not apply to—

- Areas not designated in paragraph (2);
- Food that is being transported, consumed or prepared for consumption; and
- Clean dishes and cooking equipment free of food orders.

The intent of these designations is to prevent bears and other wildlife from obtaining and habituating to food and garbage, thus protecting wildlife and park visitors alike. We strongly recommend that dishes and cooking equipment be securely stored; but clean and odor free items are not required to be stored in secure containers. We also recommend using BRC's in all areas of the park, but do not require it. Ice chests and coolers, tents, dry bags or stuff sacks, plastic packing boxes (Totes, Action Packers, etc) and unmodified kayaks are not generally approved as BRC. The park offers bear resistant containers for temporary use to the public. The containers are free of charge and can be picked up at the park's visitor center in Port Alsworth.

Attachment: 2.10 Food Storage Determination
3.20 Water skiing Determination

Determination of need for a Restriction, Condition, Public Use Limit, or Closure

Subject: Food Storage

Pursuant to Title 36 of the Code of Federal Regulations, 1.5 (c) and 2.10 (d), the Superintendent of Lake Clark National Park and Preserve has determined that in order to protect public safety and prevent adverse impacts to wildlife, conditions are placed on storage of food, garbage, lawfully taken fish or wildlife, and equipment used to cook or store food throughout the park.

The reasons for this restriction are as follows:

1. Wildlife in a natural ecosystem is adapted to exist on natural food sources only. Obtaining human food negatively alters behavior and nutrition of wildlife.
2. Both black and brown bears are common throughout the parklands. Bears are readily attracted to even small quantities of human food. They are very curious and intelligent, and will commonly open or enter containers, tents, and structures.
3. Bears are extremely susceptible to habituation to human food sources. Once they have learned to associate a site or item (e.g. tent, kayak, boat, etc.) with acquisition of food, they will return to that source repeatedly for further food rewards.
4. It does not matter whether the material is fresh, dry, powered, canned, etc. Once a curious bear has obtained a positive food reward, it will return and / or continue to seek out further rewards in similar situations.
5. Any impact to nutrition may manifest itself in reduced reproductive success and life expectancy.
6. While nutritional impact on wildlife may vary depending on a number of factors, notably the percentage of the overall diet of the animal is made up of non-natural food and during what time of year, no impact is acceptable under National Park Service management policies.
7. Bears which become habituated to human food in this area are likely to be killed by humans in defense of life or property inside the parklands or on adjacent lands.
8. Humans are at risk of injury or death when bears attempt to obtain food from tents, packs, vessels, or other similar areas.

The reasons less restrictive measures will not be effective are as follows:

1. Educational efforts regarding proper food storage and disposal of food and garbage have been undertaken by state and federal agencies in Alaska and in other western states for many years. These efforts have doubtless improved the situation and reduced wildlife/ human conflict and impacts.
2. Recognizing that variations in the environment and recreational activity require multiple food storage options, park managers have undertaken the following to assist visitors and make these conditions less onerous:

- Park supplied bear resistant food storage containers (BRFC) are available at park headquarters.
3. Despite these efforts, park managers repeatedly encounter situations in which food or garbage is improperly stored throughout the parklands.
 4. The food storage conditions imposed under this section allow for a wide variety of storage options, including free loans of portable BRFC units, to make compliance less onerous.
 5. We have considered the use of the Alaska State Administrative Code 5 AAC 92.230 which reads:

A person may not intentionally feed a moose (except under terms of a permit issued by the department), bear, wolf, coyote, fox, or wolverine, or negligently leave human food, pet food, or garbage in a manner that attracts these animals. However, this prohibition does not apply to use of bait for trapping fur bearers or hunting black bears under 5 AAC 84-5 AAC 92.

- Park employees lack authority to enforce this regulation directly, and would rely on state officers. Given limited state staffing in this area and other priorities, enforcement would be severely hampered.
 - If we adopted the language of the state regulation into a park condition under this section, we would unreasonably force our enforcement officers to prove “negligence” in court. The threshold we seek to enforce is lower given our specific legal mandate to protect wildlife.
6. Given the lack of complete compliance with educational efforts, the flexibility in compliance options, and the effort made by park managers to provide free equipment to promote compliance, these conditions are the least restrictive required to fulfill the parklands mission of protecting wildlife and human safety.

Subject: Water Skiing

Pursuant to Title 36 of the Code of Federal Regulations, 3.20(a), the Superintendent of Lake Clark National Park and Preserve has determined that it is reasonable to allow water skiing especially considering the very small scale at which this activity currently exists.

The reasons for this opening are as follows:

1. Pursuant to Title 43 of the Code of Federal Regulations 36.11(d) motor boats may be operated on all area waters, except where such use is prohibited or otherwise restricted. At present there are no restrictions on motorboats.
2. The minimal amount of water skiing that currently occurs is limited to Lake Clark and more specifically Hardenburg Bay near the village of Port Alsworth.
3. Presently water skiing is limited by the cold water temperatures of Lake Clark to a few hot sunny days mostly in June or July.
4. The most likely adverse effects of water skiing would be visitor use conflict or possible adverse impacts on nesting waterfowl. At present the NPS has no data on negative impacts to nesting birds nor has the NPS received any comments on negative impacts to other user groups.
